

When the Clock is Running,
Connectivity
Cannot Be The Delay.

TERAGO 

The Situation?

Breaking ground on a new construction site

Launching a film or TV production

Standing up a festival or live event

Opening a temporary office or trailer

Protecting revenue during critical operations

What Usually Happens.

Fibre timelines don't match project timelines

Temporary locations lack reliable high-speed access

Complex installs for short-term needs

Expensive short-term builds and teardown

Single wired path creates risk

What Fixed Wireless Changes.

Internet live in days so the site office operates from day one

High-bandwidth links ready for file transfers, cloud editing, and broadcast backhaul

Rapid deployment that supports POS, streaming, credentialing, and operations

Fast install with flexibility to relocate or scale as needed

Primary or fully diverse backup connectivity to protect uptime
